## Megan wants to be like every other little girl.

But Megan is not like most other little girls because she has a disease called **Progeria**.

Progeria is a rapid aging disease that causes **children to die** by their early teens from heart disease or stroke.

The Progeria Research Foundation

is working to cure this devastating disease. You can help save Megan and children like her.

**Learn more** about Progeria research and how you can make a difference at **PROGERIARESEARCH\_ORG.**
